

How to quote for the Sitecop range

Select the appropriate product and measure the width accross the road required.
Example - a 4m ramp with end caps would require 7 sections and a pair of end caps

Mini SiteCop (5 - 10mph)

Ideal for reducing speeds in car parks,
private roads and commercial areas
A 25mm reinforcing tube is required

SiteCop (0 - 5mph)

Designed for severe speed reduction in
high risk areas such as schools and
colleges
A 50mm reinforcing tube is required

SiteCop Plus (10 - 20mph)

Suitable for use by HGV, SiteCop Plus is
ideal for residential, retail parks and
distribution areas
A 50mm reinforcing tube is required

L = Direction of travel
W = Width of module
